DETAILED ACTION

1. Upon reconsidering the restriction requirements for the claims of Groups I and II and per applicant arguments that the claims of Groups I and II are interrelated as set forth in argument page 3, the request that the requirement for the restriction between the two groups be withdrawn is accepted.
2. Claims of group II are rejoined with claims of group I and all are examined as follows.
3. Claims 1-29 are deemed allowable.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance: Arbib et al. (U.S. Patent No. 4,092,182) discloses a solder flux composition for use in soft soldering comprising as an essentially constituent an ester of a polyhydric alcohol, organic acids which are substantially soluble in the said ester of polyhydric alcohol and polymerized rosin as a flux residue hardening agent. See col. 1, line 40 to col. 2, line 61. The solder flux composition of Arbib differs from the claimed desoldering flux is in the relative amounts of components in Arbib et al., in which an ester of polyhydric alcohol is employed as a major component i.e., at least 25% and the rosin derivative employed as a hardening component in a minor amount, i.e., 20% or less. There is no motivation or reason in the teaching Arbib or the prior art to increase the amount of the polymerized rosin of the composition of Arbib to be equal to or higher than the amount of the ester of polyhydric alcohol to arrive at the claimed invention. Furthermore since the flux composition of Arbib is for soldering there is

no reason to use it in the method for recovering a solder contaminant as claimed by the applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
